### PROFILE

- Seasoned Front-End Developer with over 11 years of experience across all phases of the Software Development Life Cycle (SDLC).
- Proficient in JavaScript/TypeScript, ReactJS, and Vue.js/Vuex, with expertise in unit and end-to-end testing using libraries such as Jest, Playwright, and Cypress.
- Extensive experience in building and optimizing responsive, scalable web applications, with a focus on performance and seamless user experience.
- Strong advocate for Agile methodologies, driving project success through efficient and transparent processes.
- Expert in delivering high-quality, user-centric solutions while aligning technical approaches with business goals.
- Highly proficient in cross-functional communication to address requirements, UX designs, and API integrations.
- Passionate about continuous learning and staying ahead of industry trends.
- Committed mentor and team player, fostering a collaborative and growth oriented environment.
- Trusted go-to for demonstrating deliverables to stakeholders, ensuring clear communication of progress and outcomes.

### PROFESSIONAL EXPERIENCE

**Senior Front End Developer**, June 2022 - Present  
Royal Pharmaceutical Society | London, United Kingdom.

- Utilized React JS, VueJS, TypeScript, and Material UI to create scalable, reusable, responsive, and testable interfaces for digital pharma publications and editorial tools.
- Played an active role in sprint planning and refinement, serving as the go-to person for Sprint Review demos.
- Collaborated with back-end and UX teams for seamless REST API integration and visually appealing designs.
- Ensured code quality and performance standards through code reviews.
- Handled on-call production support, ensuring system reliability and quick issue resolution.

**Software Product Team Lead**, February 2019 - May 2022  
Accenture Technology Solutions | Hyderabad, India.

- Led projects such as automating marketing tasks and creating brochure templates for Sproutcloud using Vue.js.
- Developed scalable, reusable micro front-end interfaces and managed a team of three with regular code reviews.
- Coordinated with the onshore team to gather requirements and implement real-time functionality, managing time zone differences effectively.
- Actively participated in scrum ceremonies and conducted R&D by developing POCs to evaluate technical feasibility.

## AWARDS

Best Employee Award – Napier  
Health Care

Gold Class Award - Accenture

**Software Engineer**, August 2016 - February 2019  
Zensar Technologies | Hyderabad, India.

- Created various slot games using JavaScript, HTML, and CSS for Derivco, an online gaming software provider.
- Proactively acquired ES6 concepts to enhance development practices.
- Worked with cross-functional teams for design and requirements, and provided production support for deployed games.
- Participated in the interview process and trained team members.

**Software Engineer**, September 2015 - August 2016  
Napier Healthcare | Hyderabad, India.

- Developed user interfaces for healthcare applications, including account management and scheduling modules, using Ext JS.
- Conducted R&D for new requirements and developed proof-of-concepts (POCs) to address emerging needs.
- Provided technical guidance and conducted code reviews to ensure highquality solutions.

**Software Associate**, January 2015 - September 2015  
Raqmiyat | Chennai, India.

- Created screens for a government HR management project using Kony Visualizer.
- Worked with UX designers to ensure design feasibility and technical implementation.
- Gained expertise in hybrid mobile application technology with Kony.

**Software Engineer**, April 2013 - December 2014  
Glasscheese Software Technologies Pvt Ltd | Chennai, India.

- Created interactive web applications for physics, chemistry, and mathematics using JavaScript, jQuery, HTML, and CSS.
- Gained extensive knowledge and experience by working in a dynamic startup setting, which involved wearing multiple hats and adapting to evolving project needs.
